

# REUSABLE BOTTLES ARE BEST

**Making  
bottles  
makes  
emissions**

The bottled water  
Americans drink in  
2016 produced as  
many greenhouse  
gas emissions as  
2.5 million cars

**Recycling  
still uses  
energy and  
resources**

Making recycled  
plastic uses as  
much water and  
60% of the energy  
as new plastic

Americans  
drink  
**14**  
billion  
gallons  
of bottled  
water  
in 2019.

That's 3500  
single-use  
bottles every  
second!

**Choose  
reusable!**

KIRKLAND  
CONSERVES

**Reusable  
bottles use  
much fewer  
resources**

Drinking from a  
reusable water  
bottle uses 85%  
less energy and  
reduces climate  
impacts by 79%

**Tap water  
is just as  
good or  
better**

Tap water has  
more rigorous  
standards and is  
monitored more  
frequently than  
bottled water
